FATHER SEES WINDS WHISK SON TO DEATH

Three Separate Twisters Joined Forces to Wreak Destruction on Princeton, Says Newspaper Man.

By United Press

PRINCETON, Ind., March 19.—Three separate twisters apparently joined forces just before the tornado which killed twenty persons struck here late Wednesday, according to Paul Ellis, a Princeton newspaper man.

Ellis said one twister approached from the southeast, one from the west and a third from the northwest.

The full force of the tornado struck in the Baldwin Heights district where the greatest damage was done.

Houses were lifted from their foundations and carried as far as one hundred yards and dropped in heaps of wreckage.

The debris was scattered in all directions. Autos were caught up by the tornado and hurled hundreds of feet into adjoining fields.

One man saw his little son playing in the yard whisked away and hurled to death against the side of a building.

Another man stepped out of his auto as he saw the storm approaching and the auto was blown away. He has not found any trace of the machine.

A sliver of glass from a broken windowpane cut one woman's throat from ear to ear.

Bodies of some of the workmen removed from the Southern Railroad shops and the Heinz canning factory were badly mangled, while the bodies of other victims bore few marks.

Never Let a Cold Get a Start

Vapors Check a Cold Overnight

There are many ways to treat a cold, but only one DIRECT way—with vapors that can be inhaled.

Vapors penetrate immediately into every corner of the air passages and lungs, soothing and healing with every breath.

Vicks is so remarkably successful in treating cold troubles because it acts like "a vapor lamp in salve form."

When rubbed over throat and chest the body heat releases vapors of Menthol, Camphor, Eucalyptus, Thyme and Turpentine. At the same time Vicks is absorbed through and stimulates the skin like a poultice or plaster.

This double, direct action often checks the worst cold overnight.
